Art Unit: 2856

1. The preliminary amendment filed Feb. 27, 2002 has been entered.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For clarity in claim 1, line 1 “ , in particular ” should be deleted. In claim 4, line 3 the limitation “ , and in particular may be optically enhanced ” is vague. In claim 7, lines 3-4 and in claim 18, lines 3-4 the limitation “ , and in particular by be optically enhanced ” is unclear. In claim 10, lines 2-4 “ a or the ... the function value ” is unclear. In claim 11, lines 2-3 “ a or an additional ” is unclear. In claim 16, lines 3-7 the number of alternatives claims render it non specific. It appears that multiple claims should instead be used.

Art Unit: 2856

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references were cited in the specification and/or show the use of optically operable displays or switches or multiple display and control panels. None however show or would have made obvious a multifunctional operating device for installation in a vehicle with a combination of a rotary switch and a plurality of press switches used as set forth and with the press switches and other elements configured as set forth in claim 1 as it is best understood.

6. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
